PROFILE

Industrial Information Technology student at LAB University of Applied Sciences with a growing foundation in programming, industrial automation, PLC systems, networking and digital technologies. I enjoy building practical projects that connect software with industrial technology and I am open to internships, trainee roles and student projects where I can continue developing my skills.

EDUCATION

LAB University of Applied Sciences | 2026 - Present

Bachelor studies in Industrial Information Technology

Focus areas include programming, automation, industrial systems, networking and modern digital technologies.

SELECTED PROJECTS

HomeFoods - Homemade Food Delivery Platform | [React](#) • [TypeScript](#) • [UI/UX](#)

[View project](#)

Multi-role web application for customers, homemade food sellers, riders and administrators. Features include authentication, seller kitchens, ordering, basket and favourites, delivery workflows, location handling and role-specific dashboards.

Halali - Interactive Restaurant Website | [HTML](#) • [CSS](#) • [JavaScript](#)

[View project](#)

Responsive restaurant website with menu browsing, customer account/profile interactions, ordering and basket functionality. Built as a practical front-end project focused on interface design and user experience.

Personal Portfolio | [Next.js](#) • [TypeScript](#) • [Tailwind CSS](#) • [Vercel](#)

[View project](#)

Responsive portfolio for presenting studies, technical skills, projects and career development, with reusable components, theme support, interactive navigation and a contact form.

ADDITIONAL EXPERIENCE

Supershop / Retail Experience | Team Member & Supervisor

Supported daily operations, customer-facing work and task coordination, developing responsibility, teamwork and communication.

Restaurant / Kitchen Experience | Service & Operational Support

Worked in a fast-paced environment where hygiene, cleanliness, flexibility and teamwork were important.
